

Missions Package

by Equalearning

MOBILE TECHNOLOGY THAT CREATES SUSTAINABLE AND INFLUENTIAL EVANGELISM

Each year, about 264 million children and teenagers around the world do not have the opportunity to go to school or complete their studies. In various countries worldwide, missionaries venture to establish churches and peace-keeping missions to teach about Christ, first aid, hygiene, and other important information people need to live healthy lives.

While many missionaries live permanently in their regions of ministry, oftentimes they are only able to stay in country for several months.

How can we ensure that the Gospel and other key lessons remain in these areas when the missionary must leave?

Equalearning has the solution. By combining our patented EQL technology with smart projectors, we can help missions plant churches and schools anywhere in the world. Equalearning's Missions Package can help missions to deliver high quality content anywhere in the world, and plant churches and schools that will remain even if the missionary team cannot.

EDUCATION IN A BOX

Equalearning's patented "online to offline" software technologies can connect educational content from the cloud to virtually any device in existence. More importantly, it allows users to access online-quality content in locations with unstable or no internet connectivity.

Equalearning can bring any educational content to any place, completely offline!

Rural Education / Mission EQL Portable School

Equalearning's mission package is a portable school that comes in the form of a solar-powered smart projector with patented encryption software that is impossible to hack. Equalearning helps missions to provide an entire school that is mobile ready for any location in the world, unrestricted by the need of electricity or the internet.

And it's incredibly simple to operate!

MISSIONS PACKAGE CONTENT

Without good content, the best projector itself is just a big flashlight. Equalearning provides shared missions content, such as continuing to cooperate with the Bible Project and other institutions to provide the best content for missionaries.

Equalearning will continue to put multilingual animations and videos of the Bible Project and other institutions into our Missions Package via SD card. Any missionary can do real-time missions at any time and any place by plugging into the smart projector. Right now, our partner, Iris Global, Zimbabwe's missionaries have begun to teach local children with the animation of the Bible Project.

Our Missions Package brings all forms of multimedia anywhere, anytime, for anyone to enjoy.

And our Missions Package is not restricted to the Gospel alone. Users are able to upload any material to bring education to the unreached.

Already, we are working on putting together material for teaching English, hygiene, first aid, wellness therapy, and skills training to help people improve their lives by the Grace of Our Lord Jesus Christ.

Children in Uganda attend class using EQL's Missions Package. The room has no electricity or internet.

Students learning about hygiene and first aid in an adult class in Zimbabwe, using Equalearning's Missions Package.

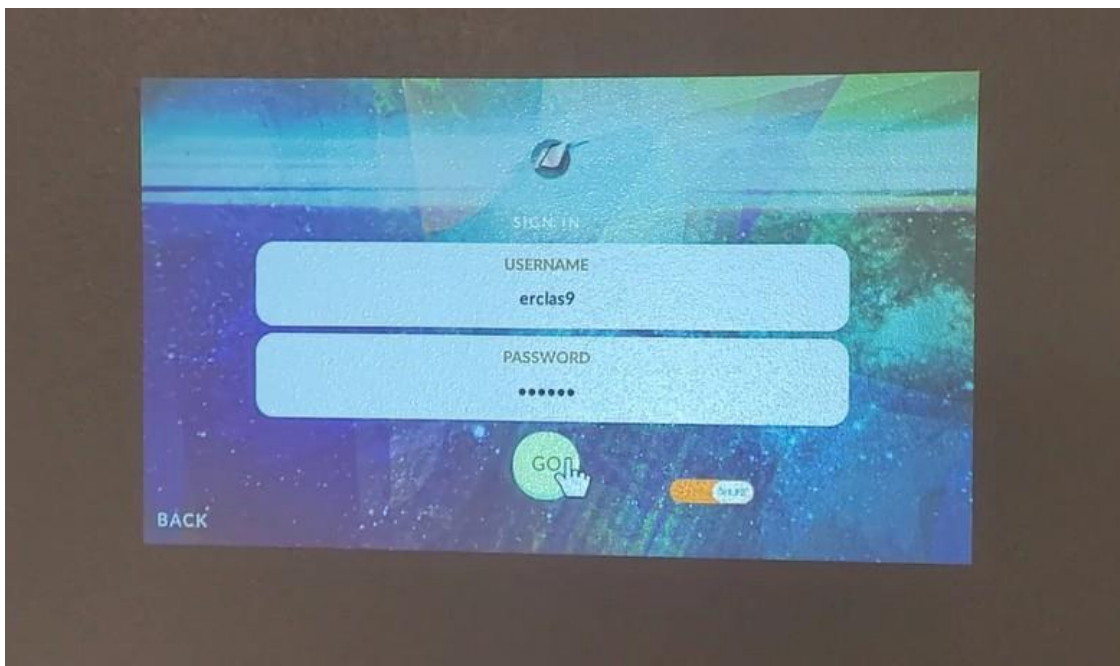

HOW IT WORKS

Our Missions Package is totally portable and has literally no restrictions. Using a smart projector with our embedded software, you simply turn on the projector in a low-lit area, select the Equalearning app, and you will find a log in screen.

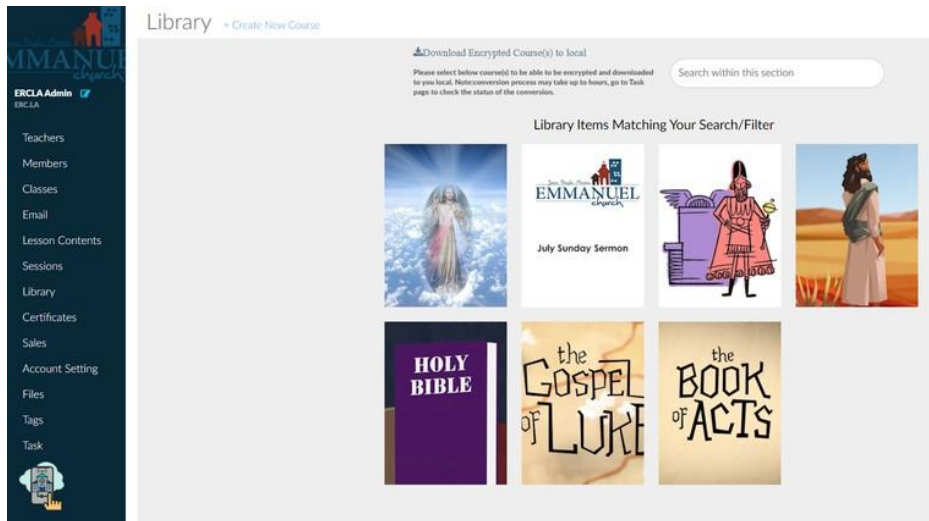

Our Missions Package has multiple accounts. For example, we created an account and placed the gospel-related multimedia content (Bible, spiritual, health) in this account, and we placed it in another account for fundamental education (language, skills) and other multimedia content.

We chose to do this as some of our missions are in areas sensitive to sharing about Jesus, and this protects the information which is already encrypted.

HOW IT WORKS

In addition to our free mission package content, churches and organizations can also choose to create their own content on our cloud platform for their members to use. The creation of content on the cloud platform is very easy. We provide various tools to help the administrators of churches and institutions to quickly create and link to other network resources. The average course creation takes only 5 minutes and does not require the help from technical people.

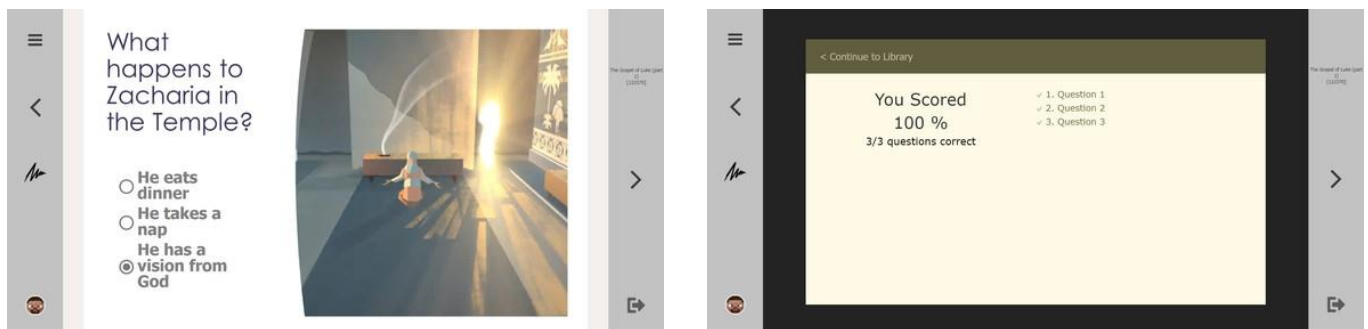

The type of material you upload and place in each account is entirely up to you as the admin and/or user. Our missions package comes pre-loaded with videos and custom lessons from The Bible Project, as well as text books for teaching English, Science, and some calming music videos for mission participants to enjoy.

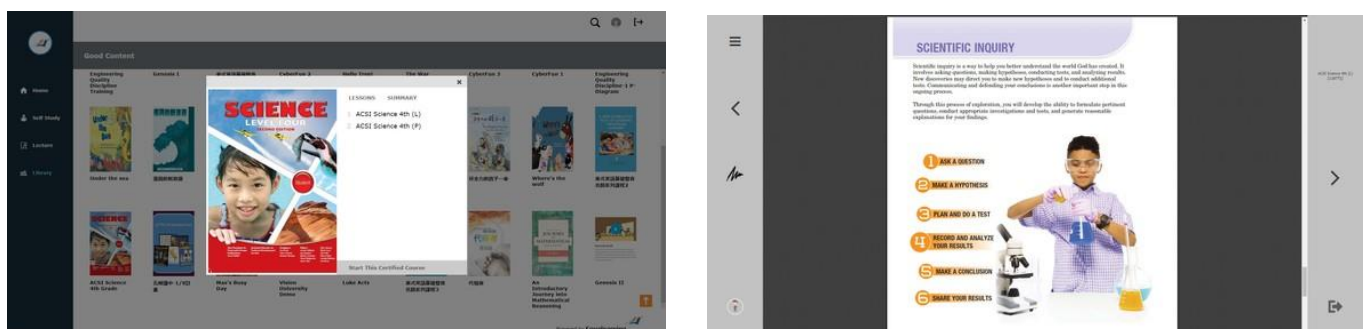

HOW IT WORKS

In addition to the entire video series, the Bible courses we provide in the Missions Package includes some series, such as "Luke and Acts", etc., placed in the form of courses, adding many interactive lessons to increase participation. As for the courses you create, you can choose to include textbooks, documents, videos, audio files, or any other types of materials, all of which can be viewed for free or played as a course.

The Mission Package comes preloaded with some material, but you can add as much as you like. It will always be encrypted but easy to access.

No matter what you plan to teach, whether it is Sunday School lessons on the Bible, or University courses that earn degrees, it can be safely and easily done using Equalearning's Missions Package.

OUR MISSIONS PACKAGE

This includes:

- ◆ 1 EQL SMART projector
- ◆ 1 Solar Power bank
- ◆ 1 white projection screen
- ◆ Equalearning App compatible with ALL smart phones, TVs, or Smart TVs.

Content updates are made available through internet or SD card with our patented encryption to safely transmit information in sensitive areas.

CMC Special: ~~\$600~~ - \$500

GET INVOLVED

At Equalearning, we are passionate about education. And now, our biggest passion is in spreading the Gospel in an interactive way to people yet unreached due to their remote location, lack of power & internet resources, or other challenged.

Isaiah 61-1: "The Spirit of the Sovereign Lord is on me, because the Lord has anointed me to proclaim good news to the poor."
